

# 50+ COMMON MISTAKES

we see every week

*Especially in  
**Ahmedabad  
Homes***

VAIBHAVI AND VANDAN  
ARCHITECTS

**READ THIS BEFORE YOU  
LOCK ANYTHING**

AHMEDABAD HOMES  
DO NOT FAIL  
BECAUSE OF MONEY.

THEY FAIL BECAUSE  
OF SMALL DECISIONS  
TAKEN CASUALLY.

Every week, we walk into homes across Ahmedabad and we see the same mistakes again and again!! Not because people are careless — but because nobody warned them early enough.

***This list is not for fear-mongering.  
It is a mirror!***

**Tip:** If you spot **5-6 mistakes**, pause.  
If you spot **10+**, don't move forward without expert guidance.

# SPACE & PLANNING MISTAKE

(MOST COMMON)

- Buying furniture before finalising layouts
- “Yeh corner baad mein dekh lenge” (it never gets fixed)
- Oversized sofas killing circulation
- Dining tables blocking natural walking paths
- Ignoring how doors actually open
- Beds blocking window ventilation
- TV unit placed purely for symmetry, not viewing comfort
- Wardrobes stealing bedroom breathing space
- Too many partitions in already small flats
- Designing rooms individually instead of holistically

**Result: Ghar bada hai, par comfortable nahi lagta**

# STORAGE MISTAKES

(GUJARATI HOUSE CLASSIC)

- No dedicated pooja storage planning
- Underestimating storage needs (especially after marriage)
- Random lofts added later
- No luggage storage planning
- Seasonal items kept “temporary” forever
- No utility / cleaning storage
- Kitchen storage based on showroom display, not daily cooking
- Clutter visible even after “premium interiors”
- Mandir units without practical drawers
- Wardrobes designed for clothes, not real Indian usage

# KITCHEN MISTAKES

(DAILY FRUSTRATION ZONE)

- Designing kitchens only for looks
- Poor workflow between sink-stove-storage
- Appliances fighting for space
- No planning for heavy vessels
- Wrong counter heights
- Ignoring ventilation completely
- Too many open shelves (dust nightmare)
- No thought given to who actually cooks
- Inconvenient plug points
- “Modular hai toh sab sahi hoga” assumption

**Kitchen galti = roz ka irritation.**

# LIGHTING & FEEL MISTAKES

- One light type everywhere
- Spotlights everywhere (hotel nahi hai yeh)
- Bright lights in bedrooms
- Dim lights in kitchens
- Decorative lights with no purpose
- Ignoring natural light directions
- Lights chosen before furniture placement
- Rooms feeling dull despite expensive finishes
- Overusing false ceiling for no reason
- No mood-based lighting

# AESTHETIC & EMOTIONAL MISTAKES

- Designing for guests, not for self
- Homes looking “complete” but not personal
- Blindly copying neighbour’s interiors
- Over-trendy elements that age badly
- Too many colours, zero harmony
- Mixing styles without intent
- No emotional connection with the space
- Saying “abhi adjust ho jaayega”
- Buying decor last-minute
- Ignoring how the home should feel

# PROCESS MISTAKES

- Finalising without full clarity
- Confusing execution speed with planning quality
- Trusting verbal assurances
- No clear sequence of decisions
- Rushing because “society pressure”
- Assuming things will auto-align
- Realising errors after moving in
- Taking too many opinions
- Skipping professional review
- Thinking mistakes are reversible

Once interiors are executed:

- Space can't be expanded
- Layout can't be undone
- Daily discomfort becomes permanent

**That's why planning is not optional!**

*If this list made you  
uncomfortable —Good !  
It means you are early to avoid  
irreversible mistakes.*

**This consultation is not about:**

- Selling designs
- Showing pretty pictures

**It's about:**

- Protecting your space
- Protecting your daily comfort
- Protecting your long-term satisfaction

- ✓ You did the right thing by booking this consultation
- ✓ Attend it with seriousness
- ✓ Ask questions before committing

**BECAUSE A HOME IS  
NOT BUILT ONCE.  
IT'S LIVED IN EVERY  
SINGLE DAY.**
